

HINO 300 SERIES 817 4X4 REAR DIFFERENTIAL LOCKER

The Hino 300 817 4x4 has proven to be popular vehicle across multitude of applications. At LDS we have developed a NoSPIN Rear Diff Locker to enhance the vehicles capability. Key features and benefits:

- Maintains maximum traction to both rear wheels to prevent loss of traction
- Unlocks when cornering to allow for wheel speed differences
- When wheels speeds match the NoSPIN will automatically re-engage
- Does not require air or electrics to operate
- Low maintenance no special oil or lubricant required
- Equally effective when operating vehicle in forward or reverse
- High quality Eaton unit, proven technology for over 30 years

Estimated Fitting Time For Most Models 4-6 Hours
